

# MCI™ SanitizAIR Curtain

ENTRY/EXIT DOORS

PURIFY

air & surfaces

PROTECT

living spaces

PREVENT

spreading germs

The working principle of air curtain

The above-the-door mounted MCI™ SANITIZAIR CURTAIN is designed to protect the indoor environment and, thereby, improve indoor air quality by dealing with pollutants in a proactive way. From above any entry or exit door, the MCI™ SanitizAIR Curtain produces aggressive ionized oxidizers and trademarked MCI™ multi-cluster ions that are then delivered and distributed by means of a wall of clean air.

Available in white or black, the MCI™ SANITIZAIR CURTAIN introduces those entering the environment to the concept of managing the indoor air quality while washing them with clean air. This trademarked MCI™ Multi-cluster Ionization Technology, using an enhanced bi-polar clustered ion output, represents the newest generation of proactive air purification, is completely safe, unlike high levels of ozone, and effectively destroys mold, mildew, bacteria, viruses, odors, volatile organic compounds (VOCs) and the odors associated with them in the air and on surfaces.

- ☑ Trademarked MCI™ Technology
- ☑ Pro-active Air and Surface Sanitization
- ☑ Cleaner Air and Surfaces
- ☑ Cleaner, Safer, Healthier Environment
- ☑ Affordable, Durable
- ☑ Energy Efficient
- ☑ Patented DBI Components

Figure 1: Antiviral efficacy of ion generator

**NOTE:** The internal components of unique MCI™ Technology has been tested and proven to reduce the microbial load in the air and on surfaces. Surrogate testing to prove efficacy for mold, bacteria and viruses has been compiled in a 550+ page booklet, available in electronic format, upon request, for your review.
