

PRODUCT DESCRIPTION

EnzyMagic 201™ is a concentrated enzymatic product specifically formulated for the cleaning of stains and odors that typically occur on surfaces exposed to high humidity and insufficient airflow. It works by penetrating and lifting the contaminants from the surface.

BENEFITS

Effectively cleans stains off any surface that is washable with water.

Note: Some severe stains may be permanent and irremovable, especially on certain porous surfaces.

- Penetrates and lifts hard to remove soils from all types of surfaces.
- Does not foster microbial strain resistance.
- USDA accepted as G.R.A.S. (Generally Regarded As Safe) according to CFR21 Sections 174-184.
- Ecologically safe, 100% biodegradable and harmless to humans, animals, marine and plant life.

Nonflammable – can be used safely near open flames and in limited ventilation areas.

COMPATABILITY

Concrete, Cinder Blocks, Bricks, Stone, Aluminum, Vinyl, Ceramic Tiles, Wood, Wallboard, Stucco, Plastic, Leather, Fabrics, Carpet and any surface that is washable with water.

USES

Bathrooms, Showers, Bath Houses, Boats, Basements, Crawl Spaces, Kitchens, Ducts, Vents, Walls, Floors, Ceilings, Roofs, Patios, Patio Furniture, Decks, Sidewalks, Driveways, Horse Saddles, Rail Cars, Tanker Trucks, Silos, Manufacturing Facilities, Processing Equipment, and any surface that is washable with water.

APPLICATION

EnzyMagic 201™ can be used on any surface that is washable with water. It is compatible with most commercial cleaning systems (pressurized, mechanical, manual) and with fresh or saline water. Optimal water temperature is 90° F (32° C), however, a range from 65-120° F or 18-49° C can be used effectively.

Apply EnzyMagic 201™ to affected area and wash away stains with sponge, cloth, or brush. Repeat application periodically as needed. For severe stains, apply solution and let stand before scrubbing. Scrub discolored grout with a brush.

EnzyMagic 201™ concentrate dilutes 20:1 with water, or 6 ounces (1½ cups) of concentrate will make 1 gallon of ready-to-use product.

Washing Machines: Fill empty washing machine tank with water. Add ½ cup of concentrate to 7-10 gallons of washing machine tank water. Mix well. Add clothes. Run washing machine cycle. Note: Check in hidden area for colorfastness prior to laundry. Fabric must be laundered in cold or warm water only. Optimal water temperature is 90° F (32° C), however, a range from 65-120° F or 18-49° C can be used effectively.

STORAGE AND HANDLING

Read the label and Material Safety Data Sheet for complete handling information before using this product.
